

Varimax rotation

A scatter plot showing the relationship between Factor 1 (X-axis) and Factor 2 (Y-axis). The X-axis ranges from -1.0 to 1.0, and the Y-axis ranges from -1.0 to 1.0. The data points are represented by open circles. There is a strong positive linear correlation between the two factors, with points clustered along a diagonal line from the bottom-left to the top-right. The points are most densely packed between 0.5 and 0.9 on both axes.
